

# YAC-A112

## N-aminoethyl-3-aminopropyltrimethoxysilane

**CAS No. 1760-24-3**

### Specifications:

Tests	Specification
Appearance	Colorless or yellowish Transparent liquid
Assay	≥98.0%
Refractive index $n_D^{25}$	1.4380-1.4480
Hazen (Pt-Co)	≤50
Density (20°C)	1.0100-1.0300 g/cm <sup>3</sup>

**Package:** 200Kg Drum.

### Application:

- Adhesion promoters in polysulfide, polyvinyl chloride plastisol, silicone two-parturethanes and epoxy adhesives and sealants. Additives in phenolic and epoxy molding compounds. Additives to latex coatings, adhesives and sealants.

**Storage:** Corrosive liquid. Keep container tightly closed in a dry and well-ventilated place. Container which are opened must be carefully resealed and kept upright to prevent leakage. Store in cool place & under inert gas. Moisture sensitive.

**Recommend Shelf Life:** 12 months.
