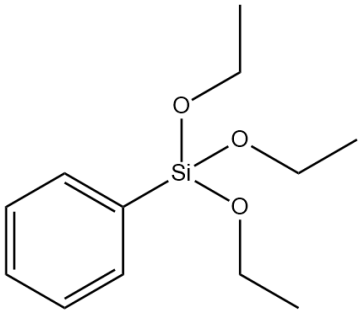
YAC-P23

Phenyltriethoxysilane



CAS: 780-69-8

Specifications:

Tests	Specification
Appearance	Colorless transparent liquid
Assay	⩾99.00%
Color	⩽30

Package: 200Kg/Drum

Application:

- Phenyltriethoxysilane is mainly used as a crosslinking agent for room-temperature vulcanized silicone rubber, a raw material for the preparation of phenyl silicone oil and silicone resin, and can also be used for hydrophobic treatment of inorganic filler surfaces to improve their dispersibility in polymers.

Storage: The product storage location should be cool, dry, well-ventilated, and away from fire sources and other hazardous materials.

Recommend Shelf Life: 12 months.
