

# YAC-08260

## Waterborne epoxy silane oligomers

CAS No. -

### Specifications:

Tests	Specification
Appearance	Colorless transparent liquid
Density (20°C)	1.09g/cm <sup>3</sup>
Viscosity(25°C)	7-10 mpa.s
Flash point	>95°C
Ph	3-4

**Package:** Net weight 25 Kg plastic drum.

### Application:

- It can be used for inorganic surface treatment, glass fiber reinforcement, glass and metal substrate coating, surface modification of organic materials, water based polymer additives.

**Storage:** Keep away from open flames, hot surfaces and sources of ignition. Keep container tightly closed.

**Recommend Shelf Life:** 12 months.
