

YAC-HMM

1,1,3,3-Tetramethyldisiloxane

CAS No. 3277-26-7

Specifications:

Tests	Specification
Appearance	Colorless transparent liquid
Assay	≥99.0%
Chlorine ion	≤10ppm

Package: 130Kg/Drum or 140Kg/Drum

Application:

- It is an organosilane reducing agent that can be used for reducing the formation of sulfides and reducing etherification reactions. It is employed in the production of addition-cure silicone rubber, silicone gel, methyl hydrogen silicone oil, and other specialty additives.

Storage: Store in a well-ventilated, cool and dry place, prevent sunlight. Keep tightly closed until used. Moisture-sensitive. Store away from incompatible substances such as oxidizing agents, acids, bases, water, metals, etc.

Recommend Shelf Life: 6 months.
